

JASON TWYMAN

SOC ANALYST I | SECURITY OPERATIONS | CYBERSECURITY ANALYST

San Clemente, CA | jasontwyman_84@yahoo.com | [linkedin.com/in/jasontwyman](https://www.linkedin.com/in/jasontwyman) | github.com/jasontwyman

PROFESSIONAL SUMMARY

Security+ certified security professional with 8+ years of experience investigating incidents, mitigating risk, documenting findings, and leading teams in regulated environments. Built evidence-backed home labs in SIEM detection design, network incident analysis, and Windows Active Directory. Brings disciplined investigation, escalation, confidentiality, and stakeholder communication to an entry-level security operations role.

TECHNICAL PROJECTS

- **Active Directory Home Lab** — Deployed Windows Server 2025 AD DS and a Windows 11 domain client; configured AD-integrated DNS, role-based groups, scoped Group Policy, and SMB access; validated secure-channel health, client policy, DNS fault recovery, and share create/read/delete access.
- **Splunk Mimikatz Detection Lab** — Packaged a portable Splunk app with a six-panel dashboard and two ATT&CK-mapped review searches for a public attack-simulation dataset; supplied reproducible measurement and configuration-validation tooling with scheduling disabled by default.
- **Network Incident Investigation Lab** — Assessed a simulated NTLM credential-compromise chain; separated direct observations from operator notes, documented confidence levels and containment actions, and identified target-side evidence required before claiming execution.

TECHNICAL SKILLS

Security Operations: Incident investigation | Security monitoring | Alert triage | Access control | Risk analysis | Incident documentation | NIST CSF / RMF

Systems & Networking: Windows | Windows Server | Active Directory | Group Policy | Linux | TCP/IP | DNS | DHCP | VPN | VLANs | Firewalls

Tools & Scripting: Splunk | Chronicle | Suricata | Wireshark | tcpdump | Nmap | VirtualBox | Python | SQL

CERTIFICATIONS & EDUCATION

CompTIA Security+ (SY0-701) | Google Cybersecurity Professional Certificate | GED

PROFESSIONAL EXPERIENCE

Security Officer II | Vast | Jan 2024 – Present

Hawthorne, CA

- Respond to and investigate security incidents at a high-security aerospace facility; document facts, findings, and recommended actions for stakeholders and management.
- Monitor access-control and surveillance systems and escalate system, credential, and procedural issues through established response channels.
- Apply security policy, protect confidential information, and support continuous-improvement efforts in a regulated, high-stakes environment.

Security Officer | Aegis Security & Investigations | Aug 2022 – Jan 2024

Culver City, CA

- Investigated incidents, preserved and documented relevant facts, and coordinated with emergency responders and law enforcement when required.
- Applied established security procedures to identify, communicate, and escalate risks affecting people, facilities, and operations.

Site Supervisor | Allied Universal | Feb 2016 – Jul 2021

Ontario, CA

- Supervised 50+ security officers supporting Amazon Air and Home Depot logistics facilities; oversaw performance, compliance, incident escalation, and operational communication.
- Trained personnel on incident reporting and response protocols; conducted controlled assessments and delivered corrective training based on findings.
